

IVAN BLAISE R. GONZALES

Software Engineer | UI/UX & Frontend Engineer

Pasig City, Metro Manila, Philippines • +63 917 112 7352 • ivanblaise02@gmail.com • linkedin.com/in/ibrgonzales • ibgonzales.netlify.app

PROFESSIONAL EXPERIENCE

UI/UX and Frontend Engineer, *Xenon Health* (USA, offshore/on-site)

2026 - Present

- Redesigned and improved the UI/UX of two healthcare systems using *Figma*, enhancing usability, navigation flow, and overall user experience across core workflows.
- Implemented responsive frontend interfaces based on redesigned user experiences using *TypeScript*, *Node.js*, and *React.js*, ensuring responsiveness, optimized performance, and maintainability.
- Designed user interfaces for AI-powered features, including a PDF-based billing data extraction tool and a healthcare recruitment matching system; collaborated with backend and AI teams to integrate seamless data flows.

Jr. Software Engineer, *UBX Philippines* (Metro Manila, hybrid)

2025 - 2026

- Developed and maintained backend services for distributed systems mainly using *TypeScript*, *Node.js*, *NestJS*, and *PostgreSQL*, with supervision through feedback and code reviews.
- Designed and extended RESTful APIs to support real-world integrations and high-volume local government data transactions; implemented Docker-based local development environments for consistency across teams.
- Participated in performance optimization and architecture discussions while applying clean code, clean architecture, microservice concepts, *React*-based frontend exposure, and *Redis* Queues through team discussions and assigned tickets.

PROJECTS

A Web-Based Testbed with Spatial Visualization Capabilities for IoT-Based Smart Systems

Full-stack Development — *Undergraduate Project, University of the Philippines Diliman*

- Designed a full-stack web platform with a 3D interactive dashboard to monitor and control IoT devices in real time; developed the backend REST API using *Node.js*, *Express.js*, and *PostgreSQL*.
- Integrated real-time communication between sensors, actuators, and the frontend visualization layer using JavaScript, REST APIs, *Three.js*, *Vite*, *GSAP*, *Git*, and *SQL/PostgreSQL*.

Himig: an AI-Powered Mood-Based Spotify Playlist Generator

Fullstack Development — *Personal Project*

- Built an AI-powered playlist generator that combines user mood inputs with Spotify top artists to create personalized playlists; integrated Spotify Web API for OAuth, playlist creation, and listening-data retrieval.
- Developed a *FastAPI* backend using Google Gemini API and an interactive 3D frontend using *TypeScript* and *React Three Fiber*.

AI Agent: Billing Document Extraction Tool

UI/UX Design — *Xenon Health*

- Redesigned the UI/UX of an AI-powered billing document extraction system in *Figma* and implemented a responsive frontend in *TypeScript*, *React.js*, and *Node.js* for reviewing and validating extracted PDF billing data.

AI Agent: Healthcare Provider Recruitment Platform

UI/UX Design — *Xenon Health*

- Redesigned key interface components for hospital-side recruitment and provider-side job discovery workflows; created a centralized dashboard and cohesive dark mode design system.

Tina - an AI-Assisted Calorie Tracker iOS App

iOS Development — *Personal Project*

- Built a cross-platform SwiftUI nutrition app for meal logging, macro tracking, onboarding, daily summaries, streaks, widgets, and *Live Activities* across iOS, watchOS, and macOS.
- Integrated Apple Foundation Models for AI-powered macro estimation from text descriptions; created hand-drawn wireframes and screen mockups before development.

Real Property Tax Account Register (RPTAR) System

Backend Development — *UBX Philippines*

- Engineered backend modules for a local government RPTAR system using *TypeScript*, *NestJS*, *TypeORM*, *PostgreSQL*, and *Docker*

Personal Web Portfolio

Frontend Development — *Deployed via Netlify and GitHub*

- Designed and developed a *React*-based portfolio with minor CI/CD integration via *GitHub* for automated build and deploy workflows.

EDUCATION

Bachelor of Science in Computer Engineering, *University of the Philippines Diliman*

2020-2025

Magna Cum Laude — GWA: 1.39 / 1.0

- Consistent College Scholar and Dean's Lister; recipient of the DOST Merit Scholarship.
- Undergraduate Thesis: A Web-Based Testbed with Spatial Visualization Capabilities for IoT-Based Smart Systems.

STEM Strand, *Philippine Science High School - Cagayan Valley Campus*

2014-2020

Graduated with High Honors — GWA: 1.34 / 1.0

- Computer Science Excellence Awardee; Consistent Director's Lister

SKILLS, AWARD, AND LEADERSHIP

Technical: TypeScript, JavaScript, Node.js, NestJS, React.js, Express.js, FastAPI, REST APIs, PostgreSQL, SQL, TypeORM, Docker, Git, Three.js, Vite, GSAP, Redis Queues, Figma, Adobe Suite, Canva, Google Suite, Microsoft Suite.

Languages: English (proficient), Filipino (native).

Awards: Distinction - *Canadian Senior Mathematics* (2019); High Distinction - *ICAS Computer Science* (2016); Distinction - *ICAS Mathematics* (2016).

Leadership: Overall Head, *Blockbooster 50* (2024) - led a team of 30 for a 3-day quiz show with 154 participants. Creatives & Publicity Head, *Maskipaps: The Crossover* (2023) - reached 3M+ users, gained 10,000+ new followers, and led a team of 5 in branding and publication design.
